OVERVIEW

This publication provides a compilation of statistical information covering degrees conferred in Pennsylvania colleges and universities. In the past, these statistics have proven to be of interest and value to educational researchers, administrators, government officials, media representatives, business leaders, and other interested individuals. This publication contains information on a variety of aspects of graduates including the number of degrees conferred by institutional category, sex, race, and level of program.

The source of this data is an annual survey of Pennsylvania colleges and universities. National data was drawn from the results of surveys conducted by the U.S. Department of Education, National Center for Education Statistics.

In addition to the 144 colleges and universities, there were 94 private licensed schools in Pennsylvania authorized to grant specialized associate degrees in business or technology (ASB and AST degrees) in 1993-94. These schools conferred 9,046 specialized associate degrees which, when added to the number of degrees from colleges and universities, would bring the total number of postsecondary degrees conferred to 113,627.

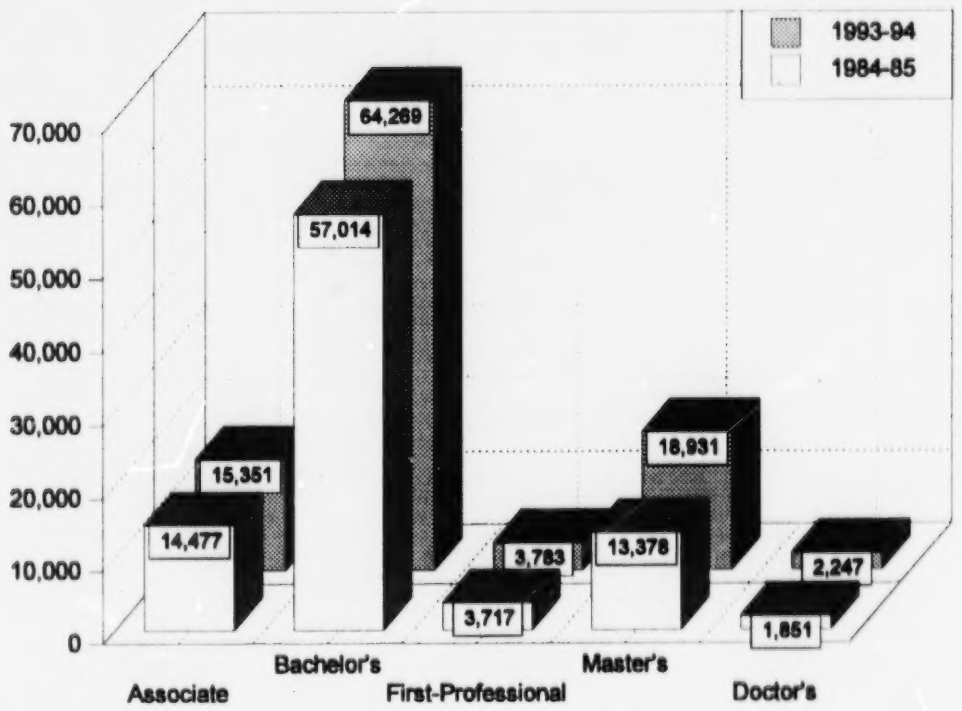
DEGREES CONFERRED BY LEVEL OF PROGRAM
1984-85 AND 1993-94



The number of degrees conferred in 1993-94 showed a 0.9% increase over 1992-93. Over the last 10 years, the largest percentage increase was at the master's level (41.5), followed by doctor's (21.4), bachelor's (12.7), associate (6.0), and first-professional (1.8).

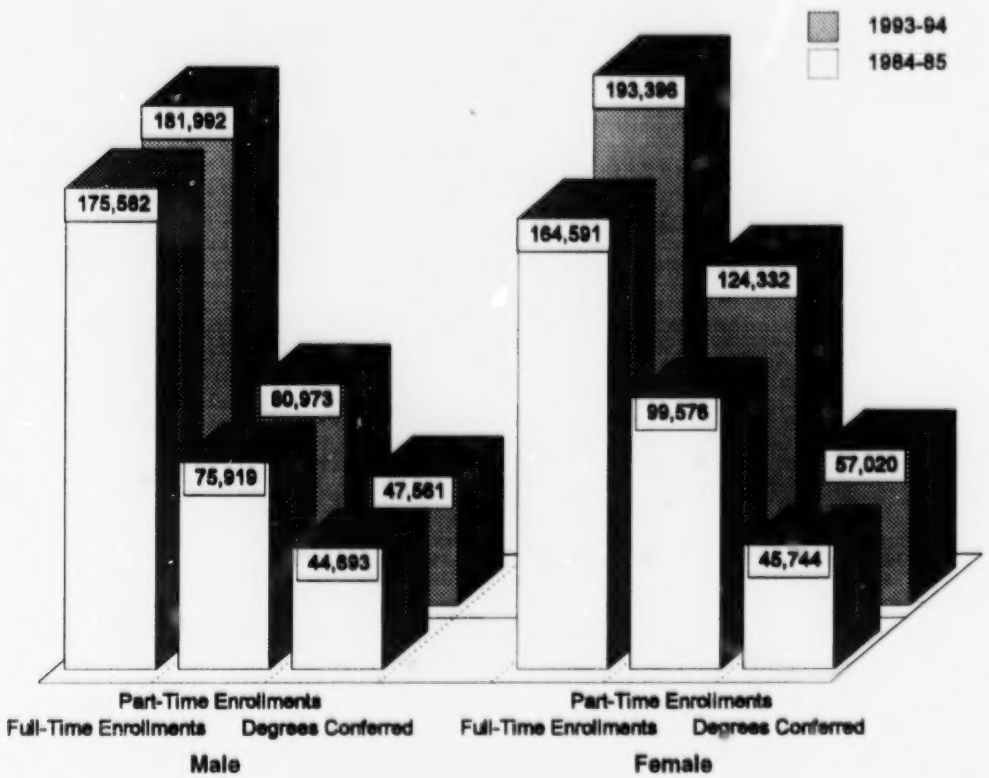
ENROLLMENTS AND DEGREES CONFERRED BY SEX
1984-85 AND 1993-94



In 1984-85, females comprised 51.2% of the total enrollments and 50.6% of the graduates, while the majority of full-time enrollees were males. Between 1984-85 and 1993-94, the number of females enrolled full-time and part-time increased 17.5% and 24.9%, respectively, while the number of females earning degrees increased 24.7%. In 1993-94, females accounted for 54.7% of the college enrollments and 54.5% of the graduates.

...private two-year colleges had the highest percentage of female graduates...

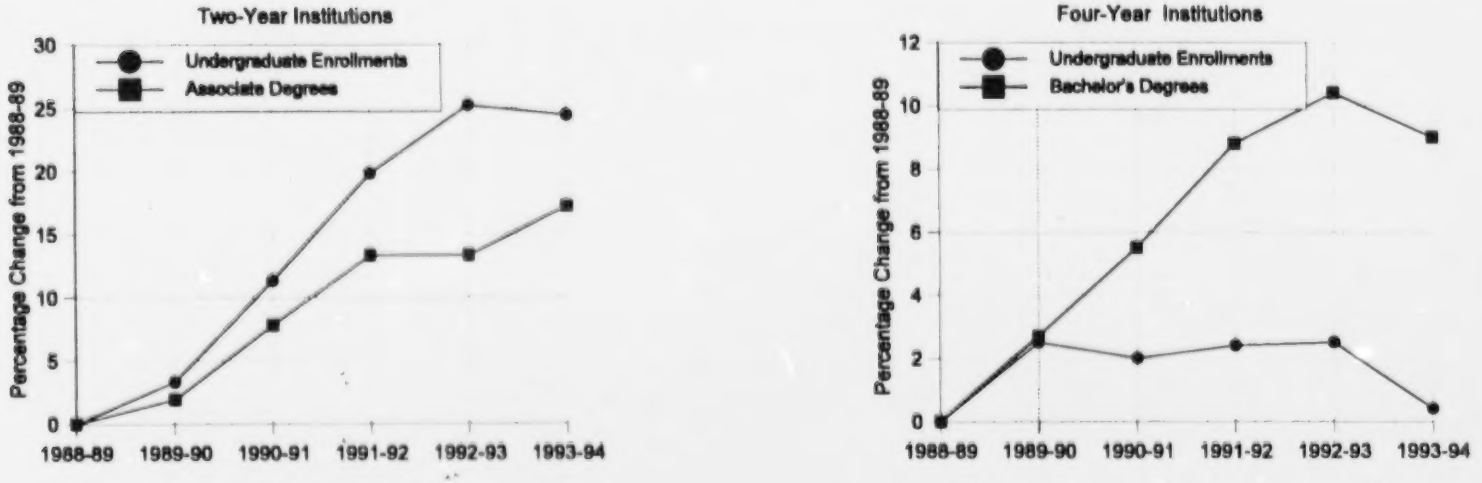
Degrees awarded to females increased 1.2% over 1992-93, while the increase for males was 0.6%. The institutional categories where females received more than 50% of the degrees conferred were: private two-year colleges (74.7%); community colleges (65.5%); state universities (60.3%); and private colleges and universities (56.1%).

Over the last ten years, growth in the proportion of female graduates ranged from 1.8 percentage points at private state-aided institutions to 5.9 percentage points at community colleges. However, the percentage of females earning degrees at private two-year colleges dropped 1.2 percentage points.

Act 211 of 1990 authorized the Thaddeus Stevens State School of Technology to grant associate degrees. In 1990-91, one percent of the graduates at that school were females, compared to 11% in 1993-94.

FIGURE 3

PERCENTAGE CHANGE OF UNDERGRADUATE ENROLLMENTS AND DEGREES CONFERRED
BY TYPE OF INSTITUTION
1988-89 THROUGH 1993-94



Between 1988-89 and 1993-94, undergraduate enrollments at two-year institutions increased 24.4%, with full-time and part-time enrollments increasing 16.9% and 29.0% respectively. During this same period, the number of associate degrees at these colleges increased 17.2%, reaching 11,051 in 1993-94.

The growth of undergraduate enrollments at four-year institutions between 1986-87 and 1989-90 was reflected in the steady climb of bachelor's degrees between 1988-89 and 1992-93. However, growth in undergraduate enrollments came to a halt in 1989-90, resulting in a decline of bachelor's degrees in 1993-94.

...the number of bachelor's degrees awarded in education increased 66.2% over the past decade...

Note: "Business Management" includes business management and administrative services, marketing operations/marketing and distribution, and personal and miscellaneous services; "Engineering" includes engineering and engineering-related technologies.

Bachelor's degrees increased 12.7% since 1984-85, comprising 61.5 % of all degrees conferred in 1993-94. The largest number of bachelor's degrees was conferred in business management, followed by education, social sciences, health, and engineering. The most recent available national data is for 1991-92. That year 1,136,553 bachelor's degrees were conferred, with the largest number in business management (22.6%), followed by social sciences (11.8%), education (9.5%), engineering (6.8%), psychology (5.6%), and health (5.4%).

A shift in the pattern of bachelor's degrees by field of study has taken place over the past decade. Declines have occurred in business management, computer and information sciences, and engineering. In contrast, education, letters, psychology, and social sciences have all grown. Data indicate similar trends on the national level. These shifts may be due in part to the increased female population in colleges, which reflect increases in predominantly female fields and decreases in predominantly male fields.
